DESCRIZIONE PRODOTTO

The **TARP Dimmable 13W LED Wall Lamp** is a wall lamp with an essential and contemporary design, designed to illuminate rooms with precise, comfortable, and easily adjustable light.

The lighting body has an **asymmetric profile**, designed to offer targeted light emission and enhance walls, corridors, entrances, living areas, or bedrooms. Its compact and clean shape makes it suitable for both modern environments and more elegant, minimal contexts.

Made of **aluminum with a soft-touch finish** and PS diffuser, TARP combines build quality, visual comfort, and practicality. It is available in three finishes: **white, anthracite, and sand**—versatile colors that easily integrate into different decor styles.

One of the main strengths is the ability to choose the color temperature via the **integrated CCT selector**:

2700K for a very warm and cozy light, **3000K** for a balanced warm light, or **4000K** for a more

functional neutral light. Additionally, the light intensity can be adjusted via a **phase-cut dimmer**, allowing the lighting to adapt to different needs throughout the day.

TARP is also **adjustable**, with **45° vertical** and **350° horizontal** regulation. This allows you to direct the light with precision, making it ideal for creating functional light points, illuminating transit areas, enhancing walls, or as a reading light in the bedroom and living area.

Technical Specifications

- Power: 13W
- Dimmable: yes, via phase-cut dimmer
- Adjustable: 45° vertically and 350° horizontally
- Color temperature: 2700K / 3000K / 4000K selectable
