DESCRIZIONE PRODOTTO

The **TARP LED Pendant Light 13W** is a modern, compact pendant lamp designed to provide comfortable lighting.

The light fixture stands out for its original design, engineered to ensure targeted and well-defined light emission. An ideal solution for elegantly illuminating dining tables, kitchen islands, nightstands, counters, reading areas, or small living spaces.

Made of **aluminum with soft touch finish** and PS diffuser, TARP combines minimalist aesthetics and functionality. The available finishes — **white, anthracite, and sand** — allow it to easily fit into modern, contemporary, or minimalist environments.

Thanks to the **integrated CCT selector**, you can set the color temperature based on the desired atmosphere: **2700K** for very warm and welcoming light, **3000K** for balanced warm light, or **4000K** for more functional neutral light.

The pendant is also **dimnable via phase-cut dimmer**, allowing you to adjust light intensity based on the time of day and room usage.

With an LED power of **13W**, high color rendering **CRI > 90**, and an estimated lifespan of **30,000 hours**, TARP is an efficient, elegant, and versatile pendant, perfect for those seeking technical yet discreet lighting, capable of enhancing the space without overwhelming it.
